# MOHAMED TOUHAMI RHAIMA

## Senior Full-Stack Developer — Laravel / Vue.js

6+ years of experience | Team Lead | Laravel framework contributor | Gabès, Tunisia
+216 24 836 687 | mohamed.rhaima96@gmail.com | Portfolio: **med-rhaima.me**
linkedin.com/in/mohamed-touhami-rhaima | github.com/Rhaima96

## PROFESSIONAL SUMMARY

Senior Full-Stack Laravel / Vue.js developer with 6 years of experience, specialized in designing scalable architectures and building complex business platforms (CRM, LMS, e-commerce, ride-hailing). Autonomous and rigorous, proactive at every stage: requirements analysis, technical choices, development, optimization and deployment.

Laravel framework contributor: 7 merged pull requests adding MariaDB vector search support, extending Laravel's CI to recent MariaDB releases and improving the official documentation. Builds applied AI features (RAG, MCP servers) and uses generative AI tools (Claude Code, Cursor) to make development more reliable and faster. Experienced in working remotely with international teams and French clients since 2022. Available within one month (notice period), open to remote or on-site roles.

## TECHNICAL SKILLS

| | |
|---|---|
| **Backend** | PHP, Laravel (v5–v13), Symfony (v6 & v7), REST APIs, MVC / HMVC Architecture, SOLID, Clean Architecture, authentication & security |
| **Frontend** | Vue.js 2 & 3, Nuxt.js, Inertia.js, Livewire 3 & 4, JavaScript, TypeScript, Tailwind CSS, Bootstrap, HTML5, CSS3 |
| **Mobile** | Flutter |
| **Databases** | MySQL, MariaDB (incl. MariaDB Vector), PostgreSQL (incl. pgvector), SQLite, MongoDB, Redis (cache, queues, sessions), multi-tenant architectures |
| **AI & LLM** | RAG (embeddings, semantic search on pgvector / MariaDB Vector), building MCP servers (Model Context Protocol) |
| **DevOps & tools** | Git (GitHub / GitLab), Docker, CI/CD (GitHub Actions, Codemagic), Filament v3, Nginx, Apache, Linux, OVH, Ionos, Hostinger, Agile / Scrum, JIRA, ClickUp |
| **AI-assisted dev** | Claude Code, Cursor, GitHub Copilot — automated code review, testing and documentation |

## PROFESSIONAL EXPERIENCE

### Full-Stack Developer, Laravel / Vue.js (Permanent)

*ECG Assurance • Gabès, Tunisia | Sep 2025 – Present*

- Designed and developed a multi-tenant business CRM with a separate database per client, from requirements analysis to deployment
- Performance optimization and ongoing maintenance of the production system

*Stack: Laravel, Vue.js, MySQL, Git, Agile methodology*

### Full-Stack Developer, Laravel / Inertia / Vue.js (Fixed-term contract)

*Black Gold • Dammam, Saudi Arabia | Sep 2024 – Aug 2025*

- Contributed to the technical architecture and technology choices for full-stack solutions
- Built specialized platforms: LMS (training), HRIS (human resources) and a job portal
- Worked closely with international engineering teams to align deliverables

*Stack: Laravel 10, Vue.js, Inertia.js, MySQL, Git*

### Team Lead & Full-Stack Laravel Developer (Freelance)

*itSolve • Île-de-France, France (remote) | Aug 2022 – Aug 2024 | Managed a team of 4*

**Jasmin Emballage — jasminemballage.fr (Aug 2022 – Aug 2023)**

- Built an e-commerce platform that processed more than 10,000 orders, with processing time cut by 40%
- Built APIs for the mobile apps; integrated payments (Sogecommerce) and shipping (Boxtal)

*Stack: Laravel, Vue.js, REST API, Pusher, Ionos*

**SOS Protech — sosprotech.fr (Aug 2023 – Dec 2023)**

- Built a platform for managing technical interventions, quotes, invoices and technician assignment
- Implemented SSR with Inertia.js, increasing organic traffic by 45%
- Generated PDF reports with digital signatures and multi-role statistics dashboards (Chart.js)
- Deployed and tuned VPS servers (Ubuntu, Apache), cutting load time by 30%

*Stack: Laravel, Vue.js 3, Inertia.js, Tailwind CSS, MySQL, GitHub Actions*

**Préfev — ride-hailing (VTC) platform (Dec 2023 – Aug 2024)**

- Full-stack development (backend and frontend) of a ride-hailing management platform
- Real-time ride booking and dispatch
- Driver, vehicle and billing management
- Online payment integration and pricing management
- Team management, effort estimation and planning

*Stack: Laravel, Livewire, Bootstrap, MySQL*

### Laravel Developer (Fixed-term contract)

*TMKiiN • Gabès, Tunisia | Jul 2020 – Aug 2022*

- Backend development of delivery and messaging platforms
- Third-party API integrations (WhatsApp, Geidea payments)
- Ongoing maintenance, API development and technical documentation

*Stack: Laravel, Vue.js, Flutter, third-party APIs, Docker, HMVC, JIRA, GitLab*

## OPEN SOURCE

### Laravel Framework — Contributor (2026) · 7 merged pull requests

*github.com/laravel/framework | github.com/laravel/docs*

- Added MariaDB support for vector distance queries, used by Laravel's semantic search (framework #61250)
- Extended Laravel's CI to MariaDB 11.8 and 12.3 LTS so vector and 11.7+ tests run on every pull request; the new job caught a test broken by a behavior change in MariaDB 11.8.1 (#61615, #61641)
- Documented vector indexes in the official Laravel documentation (docs #11368, #11371)
- Updated the MariaDB documentation: dedicated *mariadb* driver for Homestead, multi-table DELETE since 11.8.1, and clarified MariaDB's native vector support (docs #11374, #11399)

**Laravel packages (Packagist)**

- **laravel-vector-metrics**: Euclidean and cosine vector search, configurable vector indexes for MariaDB and PostgreSQL — packagist.org/packages/rhaima96/laravel-vector-metrics
- **laravel-flouci**: integration for the Flouci payment gateway — packagist.org/packages/rhaima/laravel-flouci
- **Larakonnect**: integration for the Konnect.network payment gateway — packagist.org/packages/rhaima/larakonnect
- **VoltPanel**: Laravel admin panel builder (VILT stack) — rhaima96.github.io/voltpaneldocs

## PERSONAL PROJECT

### Flync — Food delivery platform — flync.pro

- 3 Flutter apps (customer, restaurant, courier) published on the App Store and Google Play
- Laravel backend and Next.js frontend deployed to production; automated CI/CD (Codemagic, GitHub Actions)
- Firebase integration, Flouci payments, delivery zones, push notifications, real-time dashboard

*Stack: Flutter, Laravel, Next.js, Firebase, MySQL, Codemagic, GitHub Actions*

## EDUCATION

BTS (two-year higher national diploma) in Computer Science & Multimedia — ENTIC, Gabès (2021)

## LANGUAGES

French: fluent | English: professional working proficiency | Arabic: native
