PROFESSIONAL SUMMARY

Senior Full-Stack Laravel / Vue.js developer with 6+ years building business platforms (CRM, LMS, e-commerce, ride-hailing) from requirements to production. Laravel framework contributor with 7 merged pull requests, including native MariaDB vector search in Laravel 13. Currently building AI features (MCP server, Flutter assistant app) for a CRM handling millions of customer records.

TECHNICAL SKILLS

Backend	PHP, Laravel (v5–v13), Filament, REST APIs, Clean Architecture, SOLID, MVC / HMVC, authentication & security
Frontend	Vue.js 3, Nuxt, Inertia.js, Livewire, Next.js, TypeScript, JavaScript, Tailwind CSS
Testing	PHPUnit, Pest, unit & feature tests, test pipelines in CI
AI & LLM	MCP servers & tools (Model Context Protocol), RAG (embeddings, semantic search on pgvector / MariaDB Vector)
Databases	MySQL, MariaDB (incl. Vector), PostgreSQL (incl. pgvector), SQLite, Redis (cache, queues, sessions), multi-tenant (database per tenant)
Mobile	Flutter (iOS & Android, published apps), Firebase
DevOps	Git (GitHub / GitLab), Docker, CI/CD (GitHub Actions, Codemagic), Nginx, Apache, Linux
Methods	Agile / Scrum, JIRA, technical documentation
AI-assisted dev	Claude Code, Cursor, GitHub Copilot — code review, testing and documentation

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Laravel / Vue.js (Permanent)

Sep 2025 – Present

Groupe ECG Pereire Assurances · Gabès, Tunisia

- Owned the design and development of the MCP server and MCP toolbox of a multi-tenant CRM (database per tenant) managing millions of customer records, exposing CRM data to AI agents through the Model Context Protocol
- Built a Flutter mobile app: an AI assistant that answers managers' business questions in natural language by querying the CRM through MCP and RAG
- Wrote automated tests (PHPUnit / Pest) for every CRM feature; optimized performance and maintained the production system

Stack: Laravel, Vue.js, MySQL, MCP, RAG, Flutter, PHPUnit / Pest, Git, Agile

Founder & Lead Developer

Mar 2026 – Present

Flync, food delivery platform · Tunisia · flync.pro

- Built and launched a food delivery platform: 3 Flutter apps (customer, restaurant, courier) published on the App Store and Google Play
- Laravel backend and Next.js frontend in production: Flouci online payments, delivery zones, push notifications, real-time dashboard
- Automated CI/CD for the mobile apps and the web platform (Codemagic, GitHub Actions)

Stack: Flutter, Firebase, Laravel, Next.js, Flouci, Codemagic, GitHub Actions

Full-Stack Developer, Laravel / Inertia / Vue.js (Fixed-term)

Sep 2024 – Aug 2025

Black Gold Training Institute · Dammam, Saudi Arabia

- Built three platforms for the institute: an LMS (training programs), an HRIS (human resources) and a job portal
- Chose the architecture and stack (Laravel, Inertia.js, Vue.js) for the institute's business platforms
- Worked on-site with an international engineering team, from specifications to delivery

Stack: Laravel 10, Vue.js, Inertia.js, MySQL, Git

Team Lead & Full-Stack Laravel Developer (Freelance, long-term contract) Aug 2022 – Aug 2024

itSolve (Île-de-France, France) · Remote from Gabès, Tunisia · Led a team of 4

Jasmin Emballage — e-commerce (Aug 2022 – Aug 2023)

- Built an e-commerce platform that processed 10,000+ orders, cutting order processing time by 40%
- Built APIs for the mobile apps; integrated payments (Sogecommerce) and shipping (Boxtal)

Stack: Laravel, Vue.js, REST API, Pusher

SOS Protech — intervention & invoicing platform (Aug 2023 – Dec 2023)

- Built a platform for technical interventions, quotes, invoices and technician assignment
- Implemented SSR with Inertia.js, increasing organic traffic by 45%
- PDF reports with digital signatures and multi-role statistics dashboards (Chart.js)
- Deployed and tuned VPS servers (Ubuntu, Apache), cutting load time by 30%

Stack: Laravel, Vue.js 3, Inertia.js, Tailwind CSS, MySQL, GitHub Actions

Préfev — ride-hailing (VTC) platform (Dec 2023 – Aug 2024)

- Full-stack development of a ride-hailing platform: real-time booking and dispatch, driver, vehicle and billing management, online payments and pricing
- Led the team: effort estimation, planning and task distribution

Stack: Laravel, Livewire, Bootstrap, MySQL

Laravel Developer (Fixed-term) Jul 2020 – Aug 2022

TMKiiN · Gabès, Tunisia

- Backend development of delivery and messaging platforms
- Third-party API integrations (WhatsApp, Geidea payments)
- API development, ongoing maintenance and technical documentation

Stack: Laravel, Vue.js, Flutter, Docker, HMVC, JIRA, GitLab

OPEN SOURCE

Laravel Framework — Contributor (2026) · 7 merged pull requests laravel/framework · laravel/docs

- Added MariaDB support for vector distance queries, used by Laravel's semantic search (framework #61250)
- Extended Laravel's CI to MariaDB 11.8 and 12.3 LTS so vector tests run on every pull request; the new job caught a test broken by a behavior change in MariaDB 11.8.1 (#61615, #61641)
- Documented vector indexes and updated MariaDB documentation in the official Laravel docs (#11368, #11371, #11374, #11399)

Laravel packages (Packagist)

- **laravel-vector-metrics** — Euclidean and cosine vector search, configurable vector indexes for MariaDB and PostgreSQL
- **laravel-flouci** and **Larakonnect** — payment gateway integrations (Flouci, Konnect)
- **VoltPanel** — Laravel admin panel builder (VILT stack)

EDUCATION

BTS (two-year higher national diploma) in Computer Science & Multimedia — ENTIC, Gabès (2021)
